

Supplementary Material 1. Discriminant validity of the measurement model using HTMT ($N=250$)

Variable	RIPK	RIPA	SS	SE	RIPB
RIPK					
RIPA	.07				
SS	.20	.40			
SE	.26	.27	.58		
RIPB	.17	.42	.35	.56	

RIPK = Respiratory infection prevention knowledge; RIPA = Respiratory infection prevention attitude; RIPB = Respiratory infection prevention behavior; SS = Social support; SE = Self-efficacy; HTMT = Heterotrait-monotrait ratio
