

Supplementary Table. Correlation Coefficient between Complacency Subscale and Constraints Subscale of the Korean Version of the 5C Scale (N = 316)

Subscales	Complacency subscale		
	4. Vaccination is unnecessary because vaccine-preventable diseases are not common anymore.	5. My immune system is so strong, it also protects me against diseases.	6. Vaccine-preventable diseases are not so severe that I should get vaccinated.
	r		
Constraints subscale			
7. Everyday stress prevents me from getting vaccinated.	.52**	.43**	.58** [†]
8. For me, it is inconvenient to receive vaccinations.	.42**	.29**	.44**
9. Visiting the doctor's makes me feel uncomfortable; this keeps me from getting vaccinated.	.48**	.34**	.54** [†]

[†]Highly significant correlation between subscale of complacency and constraints.

**p < .01.
